*****IMPORTANT INFORMATION: PLEASE READ*****

Earlier this season, we announced that we would be discontinuing the Chandler strawberry variety in favor of introducing several newer selections. While we remain committed to offering improved genetics and modern alternatives, we've heard you loud and clear: Chandler still has a place in your fields.

Your feedback has been clear and consistent – Chandler continues to perform reliably in many regions, with yields, fruit quality, and market acceptance that meet your needs. In response, we've made the decision to bring Chandler back into our offering for the upcoming season.

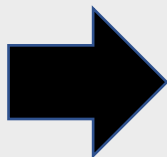

We are working to ensure that healthy Chandler plugs will be available alongside our newer varieties. We appreciate your input and trust in our plants.
